1 Sprint Goal

We had the goal of making a functional application, with navigational options, that we could use as a base for the next sprint by the end of this week. The result of this week was a functional app, where you can navigate several pages. It is not the best looking, but is a good base to continue our work with. It has low cost and

2 Backlog

This is the current backlog for thie project.

- Text input component is a work in progress.

- Login modal missing integration with project.

- Hypothetical reports on what can go wrong and access control solutions.

- React routing.

- Create Image slideshow component.

We also had a password strenght checker planned as an optional task if we had the time.

3 Time

Here is a picture of our Time list, in addition to this as this we spent about 8 hours in various meetings within the group.

4 Reflection

This section will anwser the following questions:

- Could you have done anything differently?

- What were you particularly satisfied with?

4.1 Could you have done anything differently?

Improving our team communication and collabaration could have improved our workflow a lot. Ensuring that everyone was on the same page when starting production of our application. We should've had a more refined sketch done beforehand to improve clarity and end goal.

4.2 What were you particularly satisfied with?

We achieved our goal of developing a functional application, which will serve as a foundation for the next week's sprint. This weeks work provides us with a solid, low cost base which we can utilize to its fullest to continue our development.
